80-Column Text Card: Specifications (11/96)

=====================================================================

Article Created: 31 May April 1991
Article Reviewed/Updated: 14 November 1996

TOPIC -------------------------------------------------------------

This article describes the Apple IIe 80-Column Text Card. This card has been
discontinued and is no longer available from Apple.

DISCUSSION --------------------------------------------------------

The Apple IIe 80-Column Text Card doubles the standard display of an Apple IIe
to 80 characters per screen line.  With a video monitor connected to the
computer, you can view 24 lines of either 40 or 80 characters each; and from the
keyboard, easily switch between these modes.

Installation
------------
The 80-Column Text Card plugs directly into the Auxiliary Connector slot inside
the computer, requiring no cables or additional connectors.

System Requirements
-------------------
To use the Apple IIe 80-Column Text Card, you need:
• an Apple IIe (64K RAM or more)
• an available Auxiliary Connector slot
• a suitable high resolution video display device
